🏡 JOJO 🌐 JOHN DOE 💼 /john-doe

Backend focused .NET developer with strong experience in building scalable APIs, financial systems, and internal platforms. Experienced in designing clean architectures, working with cloud services, and improving system reliability and performance. Comfortable working in cross functional teams and owning features end to end.

Education

Free University

BSc in Computer Science

Relevant Coursework

Algorithms, Databases, Distributed Systems, Software Engineering

2020 – 2024

Tbilisi, Georgia

2020 – 2024

Academic

Work Experience

TBC Bank

Senior .NET Developer

Jan 2022 – Present

Georgia

» C#, .NET, ASP.NET Core, SQL Server, Azure, Docker, CI/CD

› Designed and maintained backend services for insurance-related investment and banking products, ensuring high performance and reliability for thousands of users.

› Implemented REST APIs with authentication, authorization, and role based access control

› Collaborated effectively with product owners and frontend teams to deliver business-critical features, demonstrating strong communication and teamwork skills.

EPAM

Middle .NET Engineer

Feb 2021 – Jan 2022

Georgia

» C#, .NET, ASP.NET Core, AWS, Azure, PostgreSQL

› Worked on highly scalable cloud-based systems deployed on AWS and Azure, ensuring effective communication within the team.

› Collaborated in highly distributed teams using Agile and Scrum methodologies, focusing on effective communication and collaboration.

Saatec Ltd.

Junior Software Developer

Mar 2019 – Feb 2021

Georgia

» C#, .NET, SQL Server, WinForms, ASP.NET

› Developed internal tools and business applications for retail and e-commerce systems

› Worked with relational databases and wrote complex SQL queries

Projects

🎓 Academic: Stock Portfolio Management System

2023

» C#, .NET, REST APIs, SQL, Design Patterns

› Built a backend system for managing user portfolios, transactions, and asset history in a highly scalable environment.

› Implemented data validation, error handling, and basic analytics in a team environment, focusing on modern software development practices.

👤 Personal: Task Management and To Do Application

2022

» ASP.NET Core, Entity Framework, PostgreSQL, Docker

› Developed a full CRUD backend integrated with authentication and role management, ensuring effective functionality and security within a collaborative environment.

› Designed highly scalable database schema and API contracts from scratch, collaborating with a team of developers and designers.

⚙️ Skills

Languages C#, SQL, Python, JavaScript

Backend .NET, ASP.NET Core, Web APIs, Entity Framework, Dapper

Databases SQL Server, PostgreSQL, Indexing, Query Optimization

Cloud and DevOps Azure, AWS, Docker, CI/CD pipelines

Architecture Clean Architecture, SOLID principles, Design Patterns

➕ Interests

Backend Systems Interested in scalable systems, performance tuning, and reliability

Distributed Systems Enjoy learning how large scale systems handle data and failures

Finance and Investing Interested in stock markets, trading platforms, and financial products
